

# 48th Conference of the Perioperative Nurses College of Toputanga Tapuhi Kaitiaki o Aotearoa, NZNO

## 17 – 19 October 2024

**CALL FOR  
ABSTRACTS  
OPEN NOW!**

Submissions extended  
until Friday 29 March  
2024

### CONFERENCE THEME

## Embracing the future Everything counts

The PNC proudly welcome abstracts from Perioperative Nurses to present at our 2024 Conference at Te Papa, Wellington:

Our Conference covers every aspect of Perioperative Care-Pre-operative assessment, Intraoperative Care, Interventional Radiology and Post-Operative Care (Including PACU and Day Stay).

Take the opportunity to share your research, innovative projects, initiatives and case studies that demonstrate how patient care is being improved and teams are expanding their practice.

Your colleagues would love to hear how your area of practice works and what you have done as an individual or a team to promote excellence in perioperative care.

#### EXAMPLES OF THIS COULD BE:

- The exciting developments in pre-operative assessment and how Nurses are an essential part of preparing patients for their surgical intervention e.g. Vaping-how does it affect patient recovery?

- How intraoperative nurses have developed their knowledge and skills in the highly complex robotic theatre suite e.g. Advances in minimally invasive prostate surgery.
- PACU Nursing innovations that effectively care for patients with multiple co-morbidities e.g. complex pain control and airway management of the bariatric patient.
- Team approaches to the expansion of services and delivery of care in Medical Imaging e.g. The teams formed to manage clot retrieval treatment for PE and glues for CSF leaks.
- How your day stay ward delivers care to the patient undergoing a day stay procedure-from admission to safe discharge e.g. critical thinking skills and patient education to ensure that patients are safe to discharge.
